PROFESSIONAL EXPERIENCE

Front-End Developer at Henry

"MERN Stack E-commerce" | Dec 2021 - present

- Currently designing and developing a MERN stack e-commerce within a team of seven developers.

Full Stack Developer at Henry

"Foods App" | Nov - Dec 2021

- Designed and developed a minimalist single web application using Spoonacular Database API.
- The app consists of a landing page, a home page where each recipe is rendered and a section where the user can create his/her own recipe.
- The user can also filter each recipe by diet, and sort them alphabetically and by rating. A search bar is also included.

Full Stack Developer at Henry

"Videogames App" | Sep - Nov 2021

- Designed and developed a single web application using RAWG Video Games Database API.
- The app consists of a landing page, a home page where each video game is rendered and a section where the user can create his/her own game.
- The user can also filter each game by genre and origin, and sort them alphabetically and by rating. A search bar is also included
